

PJS

Telecoms & Utilities

Timeline

2018-19
We initially relocated to office spaces using container units and later transitioned to bigger office, where we now operate as an Openreach Service Test Assurance (STA). Our annual turnover stood at £3 million.

2021
We finalized the move to our current new build premises for the year 2023. Our team increased to 70 engineers and contractors.

2024
This year, we're looking at increasing our clients and expanding into further sectors (electrical, civils etc). Continuing the growth we've had over the last 20 years.

Location

We are situated in Burscough, which lies at the heart of the country. Our services extend nationwide, and last year, we relocated to a cutting-edge, brand-new facility.
